

Dr Sam Bailey sur l'histoire du Shedding vaxinal

[Source : @TheAmir]

Par **Sam Bailey**

Si la quasi-totalité de la communauté des défenseurs de la liberté de la santé s'accorde à dire que les vaccins COVID-19 sont dangereux, de nombreux désaccords subsistent sur les raisons de cette dangerosité. Il y a aussi la question de savoir si l'excrétion de particules par les vaccinés peut rendre malades les non-vaccinés.

Le Dr Peter McCullough a réalisé un travail remarquable en 2021, en mettant en garde le monde contre les dangers des injections de COVID-19. Toutefois, en 2022, nous avons été déçus de le voir applaudir la pseudo-science des virologues. Malheureusement, il suscite aujourd'hui la peur en promouvant l'absurdité de l'excrétion vaccinale.

Examinons l'état des preuves scientifiques concernant le « shedding » et révélons les véritables origines de ce récit.
